Subject: Iron Guard

Importance: High

Tom-

A few questions for you regarding the Iron Guard chemical you are adding:

- 1) At what point in the process, is the iron guard being added?
- 2) when / during what times and what duration is the iron guard being added? Is it a onetime application or a continuous application?
- 3) What is the quantity of iron guard that you are adding?
- 4) Could you elaborate the exact reason as to add it / what are you expecting the product to do?
